Precompiled Data Sets

What Is It?

The Precompiled Data Sets function is a service which enables NGED to provide users with secure download links to data sets which either cover the full NGED region or are not geographically referenced.

How Do I Access It?

You will need to be a registered user of the NGED DataPortal2 service and have been granted access to the **Precompiled Data Sets** functionality.

After logging in you should see the following item on the Home screen:

Click the  button to proceed.

Downloading Data

On the **Precompiled Data Sets** page you will see a list of the Data Sets which you have been granted access to:

Precompiled Data Sets

Full WPD Area (4 DNO's) in AutoCAD DWG Format		
Supplied chunked at OS 20km Grid (Assets Only). Contains WPD Assets at 11kV and above, excludes ALL Low Voltage Network. Data Extracted: 01/04/2019. File Size: 646MB	CAD Data	Download Now
Full WPD Area (4 DNO's) in Bentley Microstation v8i DGN Format		
Supplied chunked at OS 20km Grid (Assets Only). Contains WPD Assets at 11kV and above, excludes ALL Low Voltage Network. Data Extracted: 01/04/2019. File Size: 536MB	CAD Data	Download Now

Image for illustrative purposes, you may see more or less downloads available.

Click the [Download Now](#) button to the right of the Data Set you wish to download.

Please note that downloads vary in size and that some may take longer to download on slower internet connections.

Data sets may be supplied with their own user guide and / or additional documentation. Please refer to these for queries related specifically to the data set you have downloaded.
